# Some Results on Mean Cordial Graphs 

A.Nellai Murugan ${ }^{1}$ and G.Esther2<br>Department of Mathematics, V.O. Chidambaram College,<br>Tuticorin, Tamilnadu (INDIA)

#### Abstract

Let $\mathrm{G}=(\mathrm{V}, \mathrm{E})$ be a simple graph. G is said to be a mean cordial graph if $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow\{0,1,2\}$ such that for each edge uv the induced map $\mathrm{f}^{*}$ defined by $\mathrm{f}^{*}(\mathrm{uv})=\left[\frac{f(u)+f(v)}{2}\right]$ where $\lfloor\mathrm{x}\rfloor$ denote the least integer which is $\leq \mathrm{x}$ and $\left|\mathrm{e}_{\mathrm{f}}(0)-\mathrm{e}_{\mathrm{f}}(1)\right| \leq 1$ where $e_{f}(0)$ is no.of edges with zero label. $e_{f}(1)$ is no.of edges with one label.

The graph that admits a mean cordial labeling is called a mean cordial graph (MCG). In this paper, we proved that $\mathrm{D}_{2}\left[\mathrm{C}_{\mathrm{n}}\right], \mathrm{D}_{2}\left[\mathrm{~K}_{1, n}\right], \mathrm{D}_{2}\left[\mathrm{P}_{\mathrm{n}}+\mathrm{K}_{1}\right], \mathrm{D}_{2}\left[\mathrm{P}_{\mathrm{n}}\right]$ are mean cordial graphs. Key words: Mean cordial labeling, Mean cordial graph.

2000 Mathematics Subject Classification 05C78.

## 1.INTRODUCTION:

A graph G is a finite non-empty set of objects called vertices together with a set of unordered pairs of distinct vertices of $G$ which is called edges. Each $e=\{u v\}$ of vertices in $E$ is called an edge or a line of $G$. For graph theoretical Terminology we follow

## 2.PRELIMINARIES:

We define the concept of mean cordial labeling as follows.

Let $G=(V, E)$ be a simple graph. $G$ is said to be a mean cordial graph if $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow\{0,1,2\}$ such that for each edge uv the induced map $\mathrm{f}^{*}$ defined by $\mathrm{f}^{*}(\mathrm{uv})$ $=\left[\frac{f(u)+f(v)}{2}\right]$ where $\lfloor\mathrm{x}\rfloor$ denote the least integer which is $\leq \mathrm{x}$ and $\left|\mathrm{e}_{\mathrm{f}}(0)-\mathrm{e}_{\mathrm{f}}(1)\right| \leq 1$ where $\mathrm{e}_{\mathrm{f}}(0)$ is no.of edgeswith label 0 . $e_{f}(1)$ is number of edges with label 1.

A graph that admits a mean cordial labeling is called a mean cordial graph. We proved that $\mathrm{D}_{2}\left[\mathrm{C}_{\mathrm{n}}\right], \mathrm{D}_{2}\left[\mathrm{~K}_{1, \mathrm{n}}\right]$, $\mathrm{D}_{2}\left[\mathrm{P}_{\mathrm{n}}+\mathrm{K}_{1}\right], \mathrm{D}_{2}\left[\mathrm{P}_{\mathrm{n}}\right]$ are mean cordial graphs.

## Definition 2.1 (Shadow Graph)

Let $G$ be a connected Graph. A Graph, constructed by taking two copies of $G$ say $G_{1}$ and $G_{2}$ and joining each vertex
u in $\mathrm{G}_{1}$ to the neighbours of the corresponding vertex v in $\mathrm{G}_{2}$ ,that is for every vertex $u$ in $G_{1}$ there exists $v$ in $G_{2}$ such that $\mathrm{N}(\mathrm{u})=\mathrm{N}(\mathrm{v})$. The resulting Graph is known as shadow Graph and it is denoted by $\mathrm{D}_{2}(\mathrm{G})$.

## Definition 2.2 (CyCle)

A closed path is called a cycle and a cycle of length k is denoted by $\mathrm{C}_{\mathrm{k}}$.

## DEFINITION 2.3(STAR)

Let $\mathrm{S}_{\mathrm{m}, \mathrm{n}}(\mathrm{n}>2)$ is a star with n spokes in which each spoke is a path of length m .

## DEFINITION 2.4(FAN)

The join $G_{1}+G_{2}$ of $G_{1}$ and $G_{2}$ consists of $G_{1} \cup G_{2}$ and all lines joining $\mathrm{V}_{1}$ with $\mathrm{V}_{2}$ as vertex set $V\left(G_{1} \cup G_{2}\right)=V\left(G_{1}\right) \cup V\left(G_{2}\right)$ and edges $E\left(G_{1} \cup G_{2}\right)=E\left(G_{1}\right)$ $\cup E\left(G_{2}\right) \quad\left[u v: u \in V\left(G_{1}\right)\right.$ and $\left.v \in V\left(G_{2}\right)\right]$. The graph $P_{n}+K_{1}$ is called a Fan and $\mathrm{P}_{\mathrm{n}}+2 \mathrm{~K}_{1}$ is called the Doublefan.

## DEFINITION 2.5(PATH)

If all the vertices in a walk are distinct, then it is called a path and a path of length k is denoted by $\mathrm{P}_{\mathrm{k}+1}$.

## 3. Main Results on Mean Cordial Graph

Theorem 3.1
$D_{2}\left(C_{n}\right)$ is a Mean Cordial Graph.

## Proof:

Let $\mathrm{G}=(\mathrm{V}, \mathrm{E})$
Let G be $\left[\mathrm{D}_{2}\left(\mathrm{C}_{\mathrm{n}}\right)\right.$ ]
Let $\mathrm{V}\left[\mathrm{D}_{2}\left(\mathrm{C}_{\mathrm{n}}\right)\right]=\left\{\mathrm{u}_{\mathrm{i}}, \mathrm{v}_{\mathrm{i}}: 1 \leq \mathrm{i} \leq \mathrm{n}\right\}$
Let $E\left[D_{2}\left(C_{n}\right)\right]=\left\{\left[\left(u_{i} u_{i+1}\right) \cup\left(v_{i} v_{i+1}\right): 1 \leq i \leq n-1\right] \cup\right.$
$\left[\left(u_{1} u_{n}\right) \cup\left(v_{1} v_{n}\right) \cup\left(u_{1} v_{2}\right) \cup\right.$
$\left.\left(v_{1} u_{2}\right)\right] \cup\left[\left(u_{i} v_{i+1}\right) \cup\left(u_{i} v_{i-1}\right) \cup\right.$
$\left.\left.\left(v_{i} u_{i+1}\right) \cup\left(v_{i} u_{i-1}\right): 2 \leq i \leq n-1\right]\right\}$
Define $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow\{0,1,2\}$ by
$\mathrm{f}\left(\mathrm{u}_{1}\right)=1$
$\mathrm{f}\left(\mathrm{v}_{1}\right)=1$
$\mathrm{f}\left(\mathrm{u}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 0 \bmod 2 \\ 1 & \text { if } i \equiv 1 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}$
$\mathrm{f}\left(\mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 0 \bmod 2 \\ 0 \text { if } i \equiv 1 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}$
The induced edge labeling are
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \quad \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \quad \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}-1}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \quad \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}-1}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 2 \leq \mathrm{i} \leq \mathrm{n}-1$

$$
\begin{aligned}
& \text { When } n \text { is even, } f^{*}\left(\mathrm{u}_{1} \mathrm{v}_{\mathrm{n}}\right) \\
& \qquad \begin{aligned}
\mathrm{f}^{*}\left(\mathrm{u}_{1} \mathrm{v}_{2}\right) & =1 \\
\mathrm{f}^{*}\left(\mathrm{v}_{1} \mathrm{u}_{\mathrm{n}}\right) & =0 \\
\mathrm{f}^{*}\left(\mathrm{v}_{1} \mathrm{u}_{2}\right) & =0 \\
\text { When } \mathrm{n} \text { is odd, } \mathrm{f}^{*}\left(\mathrm{v}_{1} \mathrm{u}_{5}\right) & =1 \\
\mathrm{f}^{*}\left(\mathrm{u}_{1} \mathrm{v}_{\mathrm{n}}\right) & =0 \\
\mathrm{f}^{*}\left(\mathrm{v}_{1} u_{2}\right) & =0 \\
\mathrm{f}^{*}\left(\mathrm{u}_{1} \mathrm{v}_{2}\right) & =1
\end{aligned}
\end{aligned}
$$

Here $e_{f}(0)=e_{f}(1)$ for all $n$.
It satisfies the condition $\left|e_{f}(0)-e_{f}(1)\right| \leq 1$.
Hence, $\mathrm{D}_{2}\left(\mathrm{C}_{\mathrm{n}}\right)$ is a mean cordial graph.
For example the graph $D_{2}\left(\mathrm{C}_{4}\right)$ and $\mathrm{D}_{2}\left(\mathrm{C}_{5}\right)$ are shown in the figure 1 and figure 2.

Figure 1

Figure 2

## Theorem 3.2

$$
\mathrm{D}_{2}\left[\mathrm{~K}_{1, \mathrm{n}}\right] \text { is a Mean cordial Graph. }
$$

## Proof:

Let $\mathrm{G}=(\mathrm{V}, \mathrm{E})$
Let $G$ be $\mathrm{D}_{2}\left[\mathrm{~K}_{1, \mathrm{n}}\right]$
Let $\mathrm{V}\left[\mathrm{D}_{2}\left(\mathrm{~K}_{1, \mathrm{n}}\right)\right]=\left\{\mathrm{u}, \mathrm{v},\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}}\right): 1 \leq \mathrm{i} \leq \mathrm{n}\right\}$
Let $E\left[D_{2}\left(K_{1, n}\right)\right]=\left\{\left[\left(u_{i}\right) \cup\left(u v_{i}\right) \cup\left(\mathrm{v}_{\mathrm{i}}\right) \cup\left(\mathrm{v} \mathrm{v}_{\mathrm{i}}\right)\right]\right.$

$$
: 1 \leq \mathrm{i} \leq \mathrm{n}\}
$$

Define $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow\{0,1,2\}$ by
Case (i) : n is even

$$
\begin{aligned}
& \mathrm{f}(\mathrm{u})=1 \\
& \mathrm{f}(\mathrm{v})=1 \\
& \mathrm{f}\left(\mathrm{u}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}
0 & \text { if } i \equiv 1 \bmod 2 \\
2 & \text { if } i \equiv 0 \bmod 2
\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n} \\
& \mathrm{f}\left(\mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}
0 & \text { if } i \equiv 1 \bmod 2 \\
2 & \text { if } i \equiv 0 \bmod 2
\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}
\end{aligned}
$$

The induced edge labeling are
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}$
$\mathrm{f}^{*}\left(\mathrm{u} \mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}$
$\mathrm{f}^{*}\left(\mathrm{v} \mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}$
Here $\mathrm{e}_{\mathrm{f}}(0)=\mathrm{e}_{\mathrm{f}}(1)$
It satisfies the condition $\left|e_{f}(0)-e_{f}(1)\right| \leq 1$.
Hence $\left[D_{2}\left(K_{1, n}\right)\right]$ ( n is even) is a mean cordial graph.
For example $D_{2}\left(K_{1,2}\right)$ is shown in the figure 3 .

Figure 4

Theorem 3.3
Graph $\mathrm{D}_{2}\left[\mathrm{P}_{\mathrm{n}}+\mathrm{K}_{1}\right]$ is a Mean Cordial Graph.
Proof:
Let $\mathrm{G}=(\mathrm{V}, \mathrm{E})$
Let $G$ be $D_{2}\left[P_{n}+K_{1}\right]$
Let $\mathrm{V}\left[\mathrm{D}_{2}\left(\mathrm{P}_{\mathrm{n}}+\mathrm{K}_{\mathrm{l}}\right)\right]=\left\{\mathrm{u}, \mathrm{v}, \mathrm{u}_{\mathrm{i}}, \mathrm{v}_{\mathrm{i}}: 1 \leq \mathrm{i} \leq \mathrm{n}\right\}$
Let $E\left[D_{2}\left(P_{n}+K_{1}\right)\right]=\left\{\left(u_{i}\right) \cup\left(u v_{i}\right) \cup\left(\mathrm{v}_{\mathrm{i}}\right) \cup\right.$

$$
\begin{aligned}
& \left(v v_{i}\right) \cup\left(u_{i} u_{i+1}\right) \cup\left(v_{i} v_{i+1}\right) \\
& \left.\cup\left(u_{i} v_{i+1}\right) \cup\left(v_{i} u_{i+1}\right): 1 \leq i \leq n-1\right\}
\end{aligned}
$$

Define $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow\{0,1,2\}$ by
$\mathrm{f}(\mathrm{u})=2$
$f(v)=0$
$\mathrm{f}\left(\mathrm{u}_{\mathrm{i}}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}$
$\mathrm{f}\left(\mathrm{v}_{\mathrm{i}}\right)=1$
The induced edge labeling are

$$
\begin{array}{cl}
\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}}\right) & =1 \\
\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}}\right) & =1 \\
\mathrm{f}^{*}\left(\mathrm{v} \mathrm{u}_{\mathrm{i}}\right) & =0 \\
\mathrm{f}^{*}(\mathrm{v} v \mathrm{vi}) & =0 \\
\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right) & =0 \\
\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right) & =1
\end{array}
$$

$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \quad \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$

Hence $e_{f}(0)=e_{f}(1)$ for all $n$.
It satisfies the condition $\left|e_{f}(0)-e_{f}(1)\right| \leq 1$.
Hence $\mathrm{D}_{2}\left(\mathrm{P}_{\mathrm{n}}+\mathrm{K}_{1}\right)$ is a mean cordial graph
For example, $D_{2}\left(P_{2}+K_{1}\right)$ is shown in the figure 5 .

Figure 5

## Theorem 3.4

Graph $D_{2}\left(P_{n}\right)$ is a Mean Cordial Graph.

## Proof:

Let $\mathrm{G}=(\mathrm{V}, \mathrm{E})$
Let G be $\mathrm{D}_{2}\left(\mathrm{P}_{\mathrm{n}}\right)$
Let $V\left[D_{2}\left(P_{n}\right)\right]=\left\{\mathrm{u}_{\mathrm{i}}, \mathrm{v}_{\mathrm{i}}: 1 \leq \mathrm{i} \leq \mathrm{n}\right\}$
Let $E\left[D_{2}\left(P_{n}\right)\right]=\left\{\left[\left(u_{i} u_{i+1}\right): 1 \leq i \leq n-1\right] \cup\left[\left(v_{i} v_{i+1}\right): 1 \leq i \leq n-1\right]\right.$

$$
\left.\cup\left[\left(v_{i} u_{i+1}\right): 1 \leq \mathrm{i} \leq \mathrm{n}-1\right] \cup\left[\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right): 1 \leq \mathrm{i} \leq \mathrm{n}-1\right]\right\}
$$

Define $\mathrm{f}: \mathrm{V}(\mathrm{G}) \rightarrow 0,1,2\}$ by

$$
\begin{aligned}
& \left.\mathrm{f}_{\mathrm{u}}\right)=\left\{\begin{array}{l}
2 \text { if } i \equiv 1 \bmod 2 \\
0 \quad \text { if } i \equiv 0 \bmod 2
\end{array}\right\}, 1 \leq i \leq n \\
& \mathrm{f}\left(\mathrm{v}_{\mathrm{i}}\right)=\left\{\begin{array}{ll}
0 & \text { if } i \equiv 0 \bmod 2 \\
1 & \text { if } i \equiv 1 \bmod 2
\end{array}\right\}, 1 \leq i \leq n
\end{aligned}
$$

The induced edge labeling are
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right)=1,1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right)=0,1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{v}_{\mathrm{i}} \mathrm{u}_{\mathrm{i}+1}\right)=\left\{\begin{array}{ll}0 & \text { if } i \equiv 1 \bmod 2 \\ 1 & \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$
$\mathrm{f}^{*}\left(\mathrm{u}_{\mathrm{i}} \mathrm{v}_{\mathrm{i}+1}\right)=\left\{\begin{array}{l}1 \text { if } i \equiv 1 \bmod 2 \\ 0 \quad \text { if } i \equiv 0 \bmod 2\end{array}\right\}, 1 \leq \mathrm{i} \leq \mathrm{n}-1$
It satisfies the condition
$e_{f}(0)=e_{f}(1)$ for all $n$
Hence, $\mathrm{D}_{2}\left(\mathrm{P}_{\mathrm{n}}\right)$ is a mean cordial graph.
For example, the mean cordial graph of $\mathrm{D}_{2}\left(\mathrm{P}_{4}\right)$ is shown in the figure 6.

Figure 6

## 4. Conclusion

Graph labeling place a vital role not only in the theoretical aspect but also in many practical application problems. There are number of labeling such as magic labeling, graceful labeling, mean labeling and super-mean labeling.

Particularly cordial related labeling such as mean cordial, divisor cordial, mean-square cordial labeling etc. place an important role in digital technology
